// Specifications

Function	CBCT + Panorama + Cephalo(Scan) + Model Scan
Focal Spot	0.5mm
Scan Time	CBCT : 8s or 12s, 24s
	Panorama : 14s or less
	Cephalo(option) : 8s or less
FOV Size	10x8(Child), 12x10, 16x9
Voxel Size(CT)	0.2~0.3
Tube Boltage	60kV~90kV
Tube Current	4mA~10mA
Dimension(W×D×H)	eco-x, eco-x ai : 980mm x 1255mm x 2314mm
	eco-x-s, eco-x-s ai : 1802mm x 1225mm x 2314mm

AI MATHEMATICS / BIG DATA / DEEP LEARNING

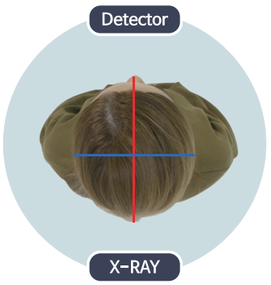
Innovation with AI Technology

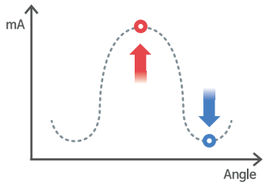
+++ **No.01** Detects differences between anatomical structure and noise to provide the high definition images with lower radiation dose than Panorama

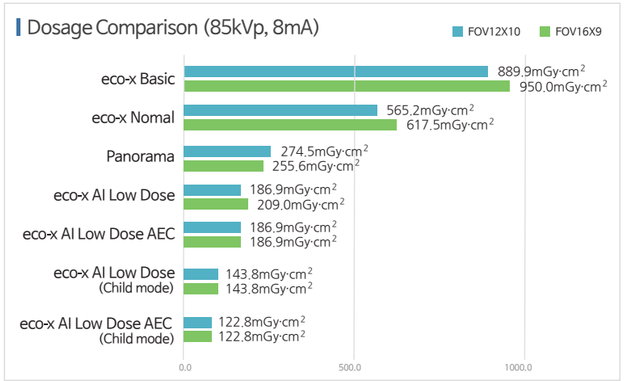
+++ **No.02** Detects the metal artifact like prosthetics to minimize distortion in anatomical structures

+++ **No.03** Automatically detects landmarks for 2D ceph tracing which is essential for orthodontic treatment

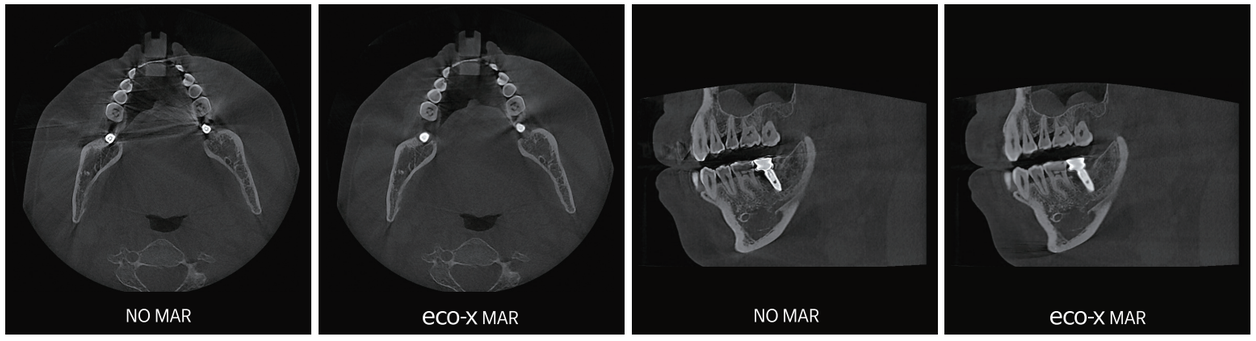
// AEC (Auto Exposure Control) Function Achieves superior imaging with dosage less than a panoramic scan



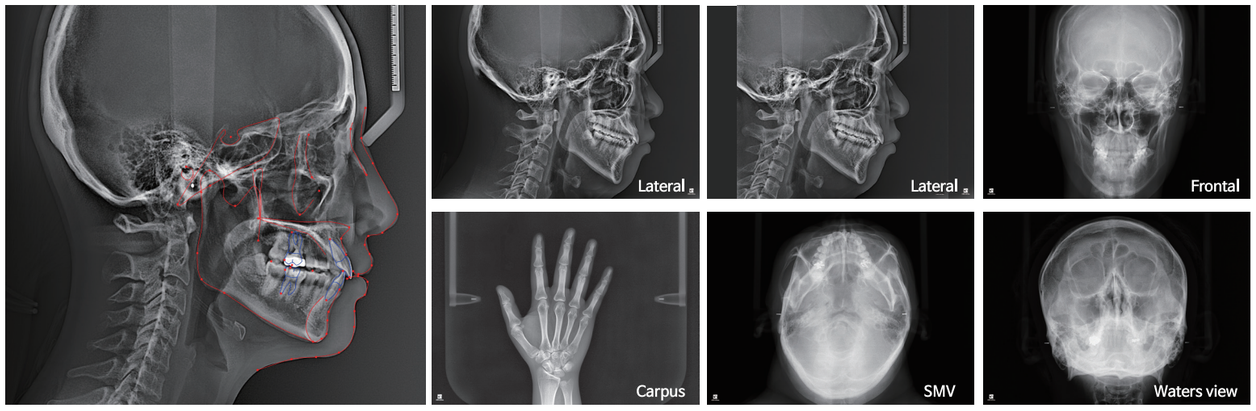




// AI MAR Detects difference between implant and anatomical structure, minimizing metal artifact



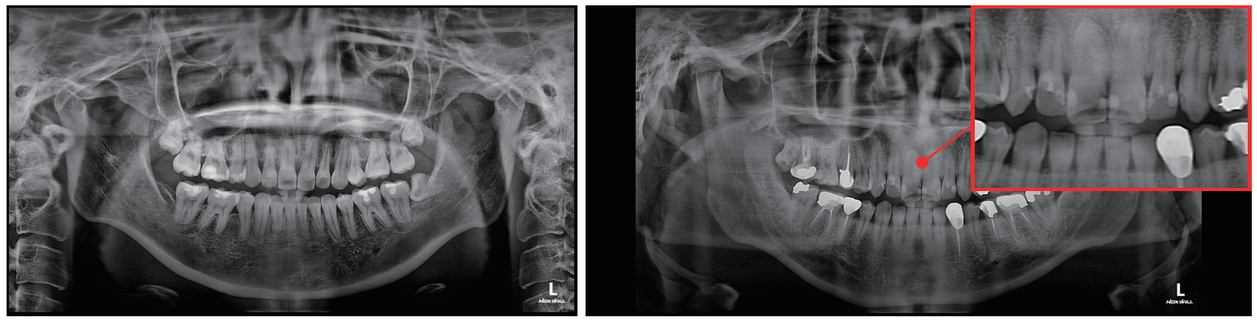
// Auto Landmark Detection AI automatically detects landmarks with 2D Cephalometric Scan



Essential Functions for Various Diagnostics

// High Quality Image FULL ARCH CT image of 360° for impacted tooth diagnosis and implant guide

// PANORAMA Dedicated 2D Panoramic Imaging for versatility



▪ **Auto Focus Panorama**

▪ **Multi Layer** allows for clear images while correcting for mispositioning
Almost 3D (2.5D)

▪ **TMJ** Open and closed mouth mode capability

▪ **Bitewing** For proximal occlusal 2D image acquisition

// Model Scan STL file is extracted simultaneously with CBCT scan of impression or model
